PROFESSIONAL SUMMARY

First-year BSc Information Science student at the Technical University of Kenya with hands-on experience building web applications using Python and Django. Independently developed a room-rental platform implementing user registration, login, authentication, CRUD operations, and rental listings. Passionate about backend development and currently expanding my knowledge of REST APIs, Django REST Framework, databases, Git, and deployment.

Seeking a backend development internship where I can learn from experienced developers while contributing to real software projects.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS

Backend: Django, CRUD operations, user authentication, registration and login

Web Development: Database-backed web applications, form handling, user-entered data

Currently Learning: Django REST Framework, REST APIs, PostgreSQL, Git/GitHub, deployment

PROJECTS

Room Rental Platform

Python | Django | HTML | CSS | JavaScript

GitHub: github.com/jobson-ochieng/room-rental-platform

- Developed a Django-based web application for managing room-rental listings.
- Implemented CRUD functionality for creating, viewing, updating, and deleting listings.
- Built user registration and login functionality.
- Implemented authentication to control access to application functionality.
- Worked with user-entered credentials and database-backed listing information.
- Developed the project independently as a practical application of Python and Django.

EDUCATION

Technical University of Kenya

BSc Information Science

Expected Graduation: 2030

First Year Student

CAREER OBJECTIVE

To obtain a backend development internship or early-career opportunity where I can strengthen my Python and Django skills, learn professional software engineering practices, receive mentorship, and contribute to real-world software projects.

ADDITIONAL INFORMATION

- Independent learner with a strong interest in backend web development.
- Currently developing skills in Django REST Framework, REST APIs, PostgreSQL, Git/GitHub, and deployment.
- Open to internship, trainee, apprenticeship, and suitable junior opportunities.
